PROFESSIONAL SUMMARY

Business and strategy analyst with experience supporting cross-functional initiatives across AI product development and operations. Skilled in requirements gathering (BRDs), stakeholder management, process improvement, gap analysis, and dashboard reporting, with a record of driving operational efficiency and closing measurable performance gaps. National-level sprinter and Northeastern athlete recognized for discipline, resilience, and high-performance execution in demanding environments.

EDUCATION

Master of Science, Project Management
Northeastern University

Dec 2026
Boston, MA

- Relevant Coursework: Foundations of Project Management, Schedule, and Cost Mgt., Project Risk Management, Project Finance, Project Quality Management, Foundations of Project Business Analysis, Product Requirements Design and Ownership, Quant. and Qual. Methods for Bus. Analysis, Advanced Seminar in Business Analysis

EXPERIENCE

AI Project Manager (Co-op)
Aosenuma.ai

Jan 2026 – Jun 2026

- Coordinated daily standups and sprint tracking for a cross-functional team of 18+ engineers, designers, and PMs, ensuring alignment and on-time delivery across six concurrent AI products.
- Designed and validated UI/UX prototypes for multiple AI initiatives, including Stake AI and a WhatsApp Summary Bot, using Stitch (Google), Claude Design, and Cursor. Developed experimental prototypes to evaluate and refine Design.md standards and UI/UX guidelines.
- Accelerated product delivery by translating requirements into development-ready specifications and moving features from planning to implementation within the same sprint cycle.
- Conducted compliance and design quality audits across AI product prototypes, created detailed scorecards, identified improvement opportunities, and presented executive-level summaries to leadership.
- Partnered with senior leadership to implement a tokenized design system spanning Notion, GitHub, Figma, and production code, improving design consistency and increasing compliance scores from 85% to 92%.

TECHNICAL SKILLS

Core Competencies: Business Analysis, Requirements Gathering (BRDs), Stakeholder Management, Process Improvement, Strategic Planning, Gap Analysis, Root Cause Analysis, Process Mapping, Workflow Design, UAT, Dashboard Development, Data Analysis

Methodologies: SDLC, Change Control, Sprint Planning, Waterfall, RACI, OKRs, KPIs

Tools/Platforms: MS Excel, MS Project, Primavera, Notion, Figma, MS PowerPoint, Claude Design, Stitch

PROJECTS

UI/UX Guidelines & Design System (design.md)

Jan 2026 – Jun 2026

Notion, GitHub, CSS/Tokens (aosenuma.tokens.json)

- Defined requirements and governance standards for a company-wide design system, including design tokens, semantic color palettes, accessibility guidelines, and component specifications, documented in a machine-readable framework synchronized across Notion, GitHub, and code.
- Established compliance review processes and evidence-based audit requirements across all AI products and product prototypes, conducting gap analyses that increased design system compliance from 85% to 92% and helped create a single source of truth adopted across active product initiatives.

LEADERSHIP & ATHLETICS

Northeastern Club Running (NUCR) — Sprinter, Track & Field
Northeastern University Athletics

Sept 2024 - Current
Boston, MA

- Compete for Northeastern University at regional, city, and state-level track and field competitions, demonstrating discipline, teamwork, and high-performance execution.
- Support university and community sporting events at Northeastern Athletics Facilities, assisting with event logistics and operations.
